PROFESSIONAL SUMMARY

Entry-level Full Stack Developer (MERN Stack) with hands-on experience in building responsive and scalable web applications using React.js, Node.js, Express.js, and MongoDB. Strong understanding of RESTful API development, JWT authentication, database design, and version control using Git/GitHub. Passionate about clean code, problem-solving, and continuous learning in Agile environments..

EDUCATION

Government College of Engineering <i>B-Tech in Electronics and Telecommunication</i>	Yavatmal 2021 – 2025
Adarsh Vidyalay Nipana <i>HSC, General Science</i>	2019 – 2021
Adarsh Vidyalay Nipana <i>SSC</i>	2018 – 2019

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML, CSS, SQL
Frontend: React.js, Bootstrap, Tailwind CSS, Responsive Design
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication
Databases: MongoDB, MySQL, Mongoose ODM
Tools & AI: Git, GitHub, OpenAI API, Google Gemini API, Clerk, Postman
Concepts: OOP, Data Structures

EXPERIENCE

SkillEcted PVT. LTD.

Full Stack Developer Intern

- Developed and deployed scalable web applications using MERN stack (MongoDB, Express.js, React.js, Node.js).
- Engineered responsive front-end components with React.js and optimized back-end services with Node.js.
- Designed and integrated RESTful APIs and managed database systems including MongoDB.
- Collaborated with development team to enhance UI/UX performance and API integration.
- Practiced Agile methodologies and used Git/GitHub for version control in collaborative environment.

PROJECTS

Task Manager Tool | *MERN Stack,*

- Developed a full-stack task management application to streamline project workflows and team collaboration.
- Implemented Agile Scrum methodologies, using Kanban-style boards for sprint planning and task tracking.
- Integrated real-time updates for task status transitions using Node.js and MongoDB.
- Utilized GitHub Projects to manage version control and link code commits to specific feature requirements.

BLOGIFY | *Node.js, Express, MongoDB, JWT*

- Developed a backend blogging web application providing secure RESTful APIs for content management.
- Implemented JWT-based authentication and password hashing (bcrypt) to ensure controlled user access.
- Designed database schemas with Mongoose for efficient post retrieval and user profile management.

Weather Application | *JavaScript, OpenWeather API, CSS*

- Built a responsive web app that fetches real-time weather data (temperature, humidity, wind) via API.
- Designed an intuitive user interface with dynamic background changes based on weather conditions.
